## **SOME IMPORTANT NEWS YOU NEED TO KNOW**

190 countries are impacted by COVID 19.

Approximately Globally: 1.7 million infected More than 100,000 have died.

Deepest impact is in mostly the developed world.

Non-developed world, Africa, Latin America, South Asia, Central Asia, and parts of South East Asia still not in major impact yet, but should come soon.

Center for Disease Control, USA, cites Korea, Italy, and Spain as all having about a 4-week time period from when a country commences aggressive mitigation (washing hands and keeping a distance from others 2-3 meters especially). After about 4 weeks the "hot spots" seem ready to crest and start down in terms of new infections, etc. Staying home for several weeks as a state or nation is proving to be a key help to reduce the national infection rates and level them off.

Some of the results of massive home shut in is dramatic increase in suicide, depression,  
And family abuse.

Some countries where a Million Village Challenge Consultation was planned have shut down their countries and required everyone to stay home.

As a result, MVC Consultations in a number of areas have been postponed.
